Severe Weather Outlook Tuesday, April 30, 2019

Hazardous Weather

High Wind Warning

Through 6 PM MDT / 7PM CDT Today

Weather Forecast Office
Midland/Odessa, TX
Issued April 30, 2019 4:30 AM CT

High Wind Warning
across...the Guadalupe
and Delaware Mountains

Winds

- Southwest 35 to 45 mph
- Gusts up to 60 mph

Impacts

- Severe aircraft turbulence possible
- High profile vehicles may be difficult to control

f t NWSMidland

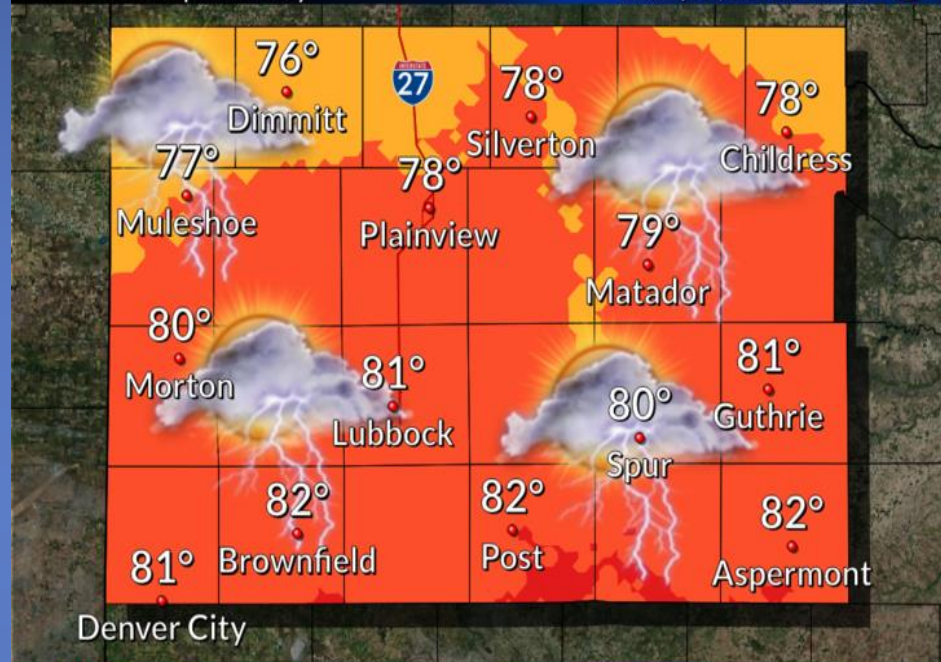

weather.gov/maf

A High Wind Warning is in effect today for the Guadalupe and Delaware Mountains. Southwesterly winds will reach 35 to 45 mph, with gusts to 60 mph. Be careful, especially if driving a high profile vehicle in these areas!

Tuesdays High Temperatures

Thunderstorms are possible today

Weather Forecast Office
Lubbock, TX
Issued Apr 30, 2019 5:27 AM CDT

f t NWSLubbock

weather.gov/lub

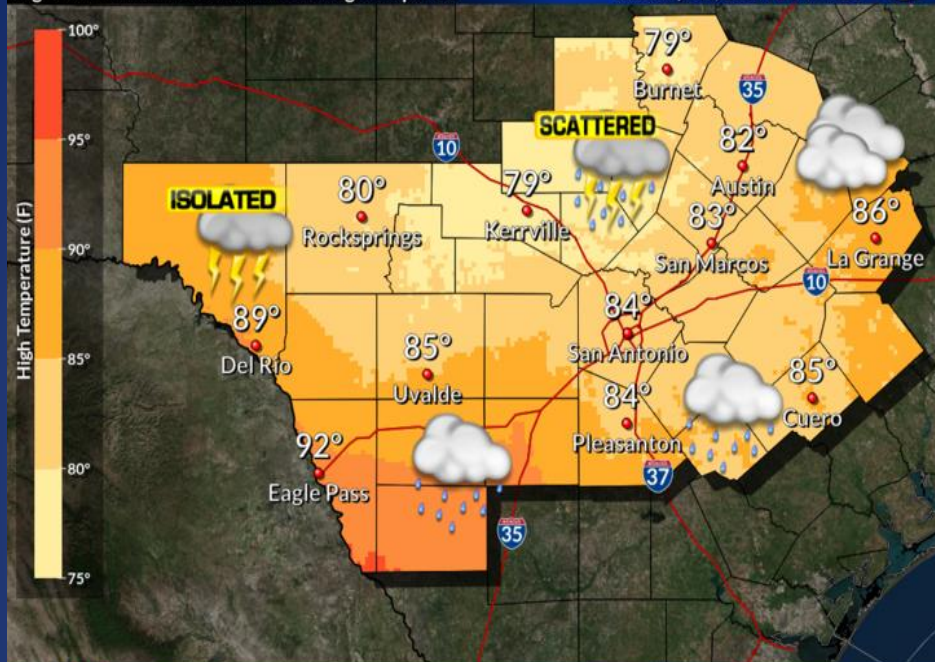

Cloudy with showers possible early in the day then becoming sunny with southwest winds.

Hazardous Weather

Cloudy and Breezy

Slight to low end chances for rain through the period

Weather Forecast Office
Austin/San Antonio, TX
Issued Apr 30, 2019 3:31 AM CDT

f t NWSSanAntonio

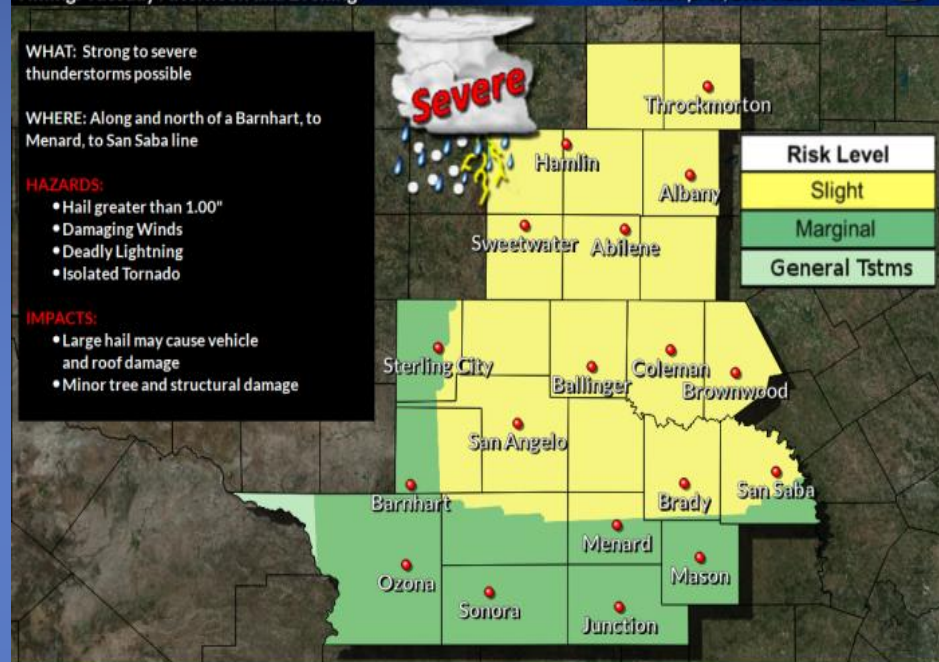

weather.gov/ewx

Mostly cloudy skies will prevail today with southeast winds 10-15 mph with gusts up to 25 mph. Highs will range from the upper 70s across the Hill Country to the lower 90s in the southwest. There is slight to low end chance for showers and thunderstorms across the Hill Country mainly this afternoon.

Severe Thunderstorm Chances Today

Timing: Tuesday Afternoon and Evening

Weather Forecast Office
San Angelo, TX
Issued Apr 30, 2019 5:28 AM CDT

f t NWSSanAngelo

weather.gov/sjt

Strong to severe thunderstorms are possible this afternoon and evening, generally north of a Barnhart, to Menard, to San Saba line. The main hazards will be large hail, damaging winds, and deadly lightning. An isolated tornado cannot be ruled out.

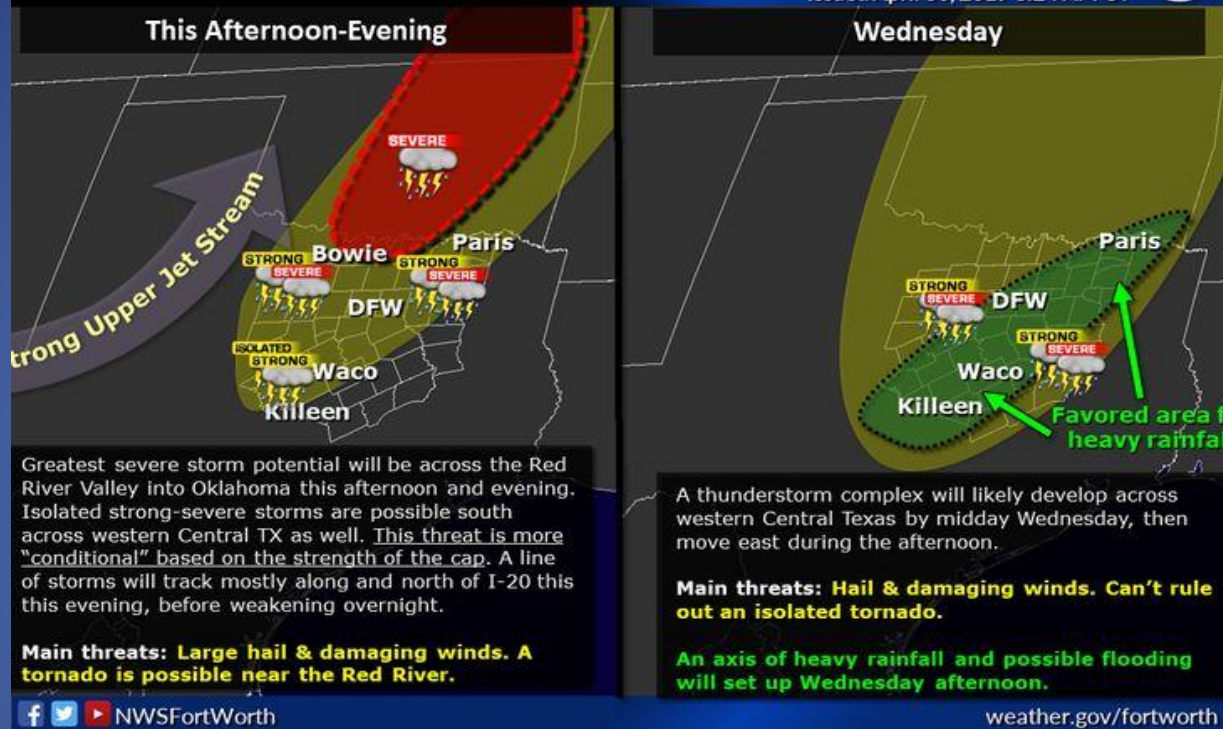

Hazardous Weather

Mid-Week Thunderstorm Potential

Weather Forecast Office

Fort Worth, TX

Issued April 30, 2019 6:24 AM CT

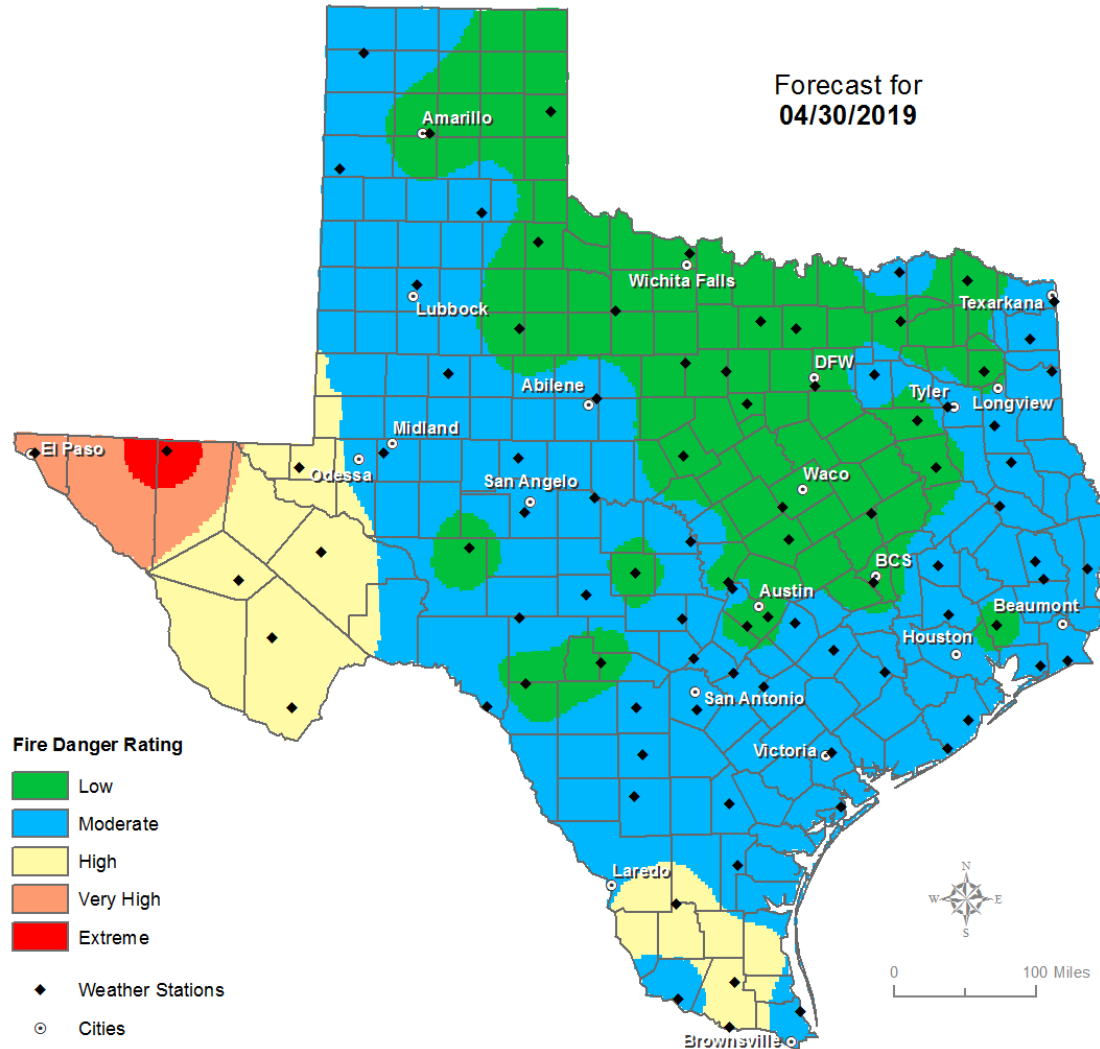

An active weather pattern continues today through Wednesday. A couple of upper disturbances will lift northeast across North and Central Texas each day. The potential for severe weather will increase this afternoon and continue through this evening, especially along and north of I-20/30 corridors. Main hazards will be large hail, damaging winds, and frequent lightning. An isolated tornado will be possible north of I-20 and toward the Red River Valley. A brief lull is expected during the overnight hours, however more showers and storms are expected to overspread the area from the southwest Wednesday morning, with a possible complex of strong-severe storms moving across the area by Wednesday afternoon and evening once again. In addition, training of thunderstorms with heavy rainfall may result in axis of localized, high rainfall amounts and at isolated instances of flash-flooding. Stay weather aware both today and again Wednesday regarding forecast updates, watches, and warnings and have multiple sources for receiving weather updates!
